SKYCHECK

SELF-SERVICE CHECK-IN KIOSK

AUTOMATED SOLUTION FOR SELF-SERVICE CHECK-IN
IMPROVES PASSENGER SATISFACTION BY REDUCING
OVERALL WAITING TIMES

easier
AIRPORT SOLUTIONS

DESCRIPTION

The kiosk design provides the best total cost of ownership, by reducing workload for the agents. It has a robust and modular conception, with easy access for daily operation and services.

The self-service check-in kiosk can be delivered with the EASIER CUSS platform. It can run any of the airline CUSS Check-in application certified by EASIER.

The self-service check-in kiosk is biometric-ready, designed to integrate a facial recognition device and a passport reader. It can also connect to the Central Database for seamless user enrollment.

The biometric solution is compliant with DBMS & GDRP requirements and best practices.

With its elegant, innovative and disruptive design, the self-service check-in kiosk fits perfectly into any architectural style.

KEY FEATURES

- Standard pedestal on a baseplate adapted to PMR users kiosk can be fixed to the floor
- Sturdy and rigid self-supporting steel frame
- Large 17th touchscreen in landscape mode allowing a comfortable visibility for users
- PC i5, SSD 256GB, RAM 2x 8 GB, Win10 Enterprise license
